

# YILMAZ EV

## FRONT-END DEVELOPER

Since the age of nine, I have extensive experience in front-end and a passion for continuous development. I develop modern and user-oriented web projects with advanced technologies such as NextJS, Typescript and Tailwind. I have practical experience with various tools such as React, Styled Components, SCSS and Bootstrap. I aim to add value as an innovative and creative person with the knowledge I have gained through personal research and real projects rather than my education.

### SKILLS

HTML5	CSS3
Javascript	SASS
Typescript	Styled Components
React	Tailwind
NextJS	Bootstrap

### EDUCATION

#### WEB DESIGN AND CODING

Open Education Faculty  
Ataturk University | 2023 - Continues

### EXPERIENCE

#### FREELANCER

March 2020 - March 2023

In my projects in the web sector, I had a working period in which I provided sales and project-based support services on a global level, especially in Europe. In this process, I developed various web projects for international customers and took active roles in the sales and support stages of these projects.

#### PSIKOLOGOFISI.COM

Remote | March 2023 - January 2024

I am working on the Psikologofisi project with a quality team. In this project, I have gained significant experience in pixel-perfect design, API integration, payment processing, etc. I have gained extensive knowledge in these areas. These experiences have significantly improved my professional skill set and reinforced my expertise in web development.
